

Parallels® Plesk Panel

Focus on Your Business - Not Your Servers

Parallels® Plesk Panel — one of the leading hosting control panels on the market today — offers a simple and convenient way to manage your web hosting services. In just minutes, you can sign on to your hosting account and find the tools you need to set up email, databases, websites, and more. With Parallels Plesk Panel you can:

✓ **Focus on your business**

Parallels Plesk Panel is designed to meet the needs of small to medium businesses. It's intuitive and easy to use, so you can manage web hosting tasks with just a few clicks of the mouse and get back to business in no time.

✓ **Help your employees be more productive**

Give your employees the rich email and collaboration tools they need to be truly productive. Plus, you can easily add employees to your setup and control how they access the system.

✓ **Be self-sufficient, but not alone**

Because Parallels Plesk Panel was built to be easy to understand, you can manage your servers with little help from your provider. But if you need additional assistance, our support team is here to answer even your most technical questions.

✓ **Stay ahead of the game**

Modern websites are more than just text and images. They feature blogs, ecommerce, customer management tools, collaboration tools, and many other cool apps. Choose the ones you need and implement them with a single click.

What is a Control Panel?

A control panel is software that interfaces with a hosting server and lets you quickly and easily manage your web presence. Some hosting providers include a control panel with your hosting plan, while others sell it as an add-on.

Control panels are web-based tools and are easy to use because of the graphic interface and simple menu navigation. With a click of an icon, you can manage common server tasks such as setting up email accounts or assigning domain names (your website address or URL).

The control panel (sometimes paired with website building tools) also allows you to create and add content to your website and to control how it appears on the Internet.

Feature	Parallels Plesk Panel
Simple website management	At the heart of any hosting server is the website that it manages. Parallels Plesk Panel suite includes Parallels Plesk Sitebuilder as an option to help you create a great website with ease. It uses a short 5-step wizard to make adding and editing content a breeze, and features several hundred pre-made templates and a simple word processing interface.
Cool apps	At your fingertips are 200+ applications for real-time deployment. With a click of a mouse, you can select an app to instantly use it directly from the web. Available apps include tools like social media add-ons (blog, forum, guest-book, etc), ecommerce, webmail, content management systems, CRM tools, help desks, and collaboration tools. You can even add fun items like galleries, game servers, and genealogy tools.
Runs with any gear	Parallels Plesk Panel runs on the widest variety of servers. It supports both Microsoft Windows based servers and many variations of Linux. It is available on both 32 bit and 64 bit systems. It can be installed on a dedicated server or even on a virtual private server. This flexibility lets you focus more on your business needs and less on the hardware needed to run it.
Easy growth path	All Parallels products are designed to fit together seamlessly with one user interface. When you add more functionality to your system, such as Parallels Plesk Billing or Parallels Plesk Sitebuilder, you'll be quickly up and running with the new software. Plus, you can sign on with just one login and password. That's growth made easy!
It's virtual reality	Running your hosting on virtual private servers (VPS)? If so, you'll find the Parallels Plesk Panel to be the fastest and most integrated control panel available for VPS hosting.
Great company	Parallels is a worldwide leader in virtualization and automation software that optimizes computing for consumers, businesses, and service providers across all major hardware, operating system, and virtualization platforms. Founded in 1999, Parallels is a fast-growing, global company with offices in North America, Europe, and Asia.
